

The background of the image features a wooden pallet with several vertical slats. Four fabric samples are draped over the slats, hanging from small metal rings. The fabrics are in shades of blue and green, with some showing a fine, woven texture. To the right of the pallet, a roll of similar fabric is visible, partially covered by a woven, circular object that looks like a basket or a hat. The overall lighting is soft and directional, coming from the left, which creates subtle shadows and highlights the textures of the wood and fabric.

RELIABLE & RESPONSIVE

Kets understands the importance of “Just-in-time” in today’s world. Not only do our customers want shorter lead times, they are also looking for flexibility and increasingly customised solutions. Having a massive production infrastructure, fully integrated manufacturing plant and huge raw material stocks makes us a reliable and responsive partner for our customers. With this capabilities we serve our customers with the best on time delivery terms and we quickly respond to their requirements in ever shorter time frames.

R&D DEPARTMENT FOR ADVANCED INNOVATIONS

To carry out R&D projects on a more systematic and scientific basis, KETS established its R&D center in 2015 which is registered and supported by The Ministry of Science, Industry and Technology.

Our R&D department's global partnership and collaboration with other companies, universities and others are the key to meeting customer needs in critical areas;

- Sustainability, light-weight, bio-energetic and more durable fabric projects such as Easy Life Pro in order to assist the development of high performance fabrics in a cost effective way.
- Improvements of all standards for the protection and safety of people and the environment with new innovative technologies.
- We spend 2% of our sales turnover for our R&D projects.

CUSTOM MADE SOLUTION DEVELOPMENT DEPARTMENT

Custom made service is one of the most important department in KETS. Here our design and colouring professionals listen and understand our customers requests for colour, material and design. They present our customers with paint chips, yarn and fabric swatches, plans that will help them shape the initial design in their mind. Our design consultants work closely with our customers to create colour solutions that will match their demands, converted + realised in an average time of 21 days.

We give a possibility to our customers to cook their own meals by using our limitless ingredients, which means **nothing is impossible for them.**
